Why I built this app in the first place

Have You Considered, LLC., [Personal Website](#)

About the Developer

Have You Considered, LLC is an independent app developer building software on their own terms. They have experience shipping apps from idea to release, and focus on simple, useful software that people can rely on. I focus on no subscriptions, and user privacy, no ads, no tracking, just simple, functional software. Other apps they've released include Wasted Time (to track the cost of getting meetings started), Vinyl Tracker (for the vinyl collector), Greeting Tracker(Never send the same card twice), and Quick Localizer (automated XCStrings translator). Their latest app is Stepwise Improvements, which will be released on August 1, 2026.

Michael Rowe (lead Developer) is also a podcaster at <https://gamesatwork.biz> and blogs at <https://michaelrowe01.com>
